Jamal Tannous – Recommendation Letter

To whom it may concern,

I have supervised Jamal during his undergraduate project [“Remote Dog Chip Reader”](#) at the High Speed Digital Systems Lab at the Technion.

Jamal designed an integrated system, based on Arduino HW and embedded SW, as well as an Android application that communicates with it, and database it interacts with.

Jamal managed to overcome technical obstacles he and his project partner have encountered. He conducted the tests and verification needed to get the system matured and performing to spec.

Throughout the project Jamal kept a positive attitude and a strong eagerness to innovate and acquire new skills and knowledge.

For additional information you can contact me at boazmizrachi1@gmail.com, or 0546-800632.

Sincerely,

Boaz Mizrachi

Supervisor – High Speed Digital Lab – EE Faculty
